About Me

As an aspiring Full Stack Web Developer and current BCA student, I'm dedicated to mastering Full-end technologies. My academic foundation is complemented by hands-on experience in personal web projects, where I tackle complex challenges and nurture my problem-solving skills. I thrive in the creative and dynamic world of web development.

Projects

Contact Manager

A secure and intuitive web application for managing and organizing contacts efficiently.

Technologies Used:

- Back-end: Spring Boot (core logic, user authentication, email verification, contact management)
- Security: Spring Security (authentication, OAuth2, authorization)
- Email Service: JavaMailSender (email verification during registration)
- Cloud Storage: Cloudinary (image storage)
- Front-end: Thymeleaf (server-side templating), HTML, CSS, Tailwind CSS
- Database: MySQL (stores contacts, user data, and verification tokens)

Secure File Sharing App

A secure and role-based file-sharing application built with Spring Boot, allowing users to upload, share, and access files with controlled permissions. Files are stored temporarily and automatically deleted after 24 hours.

Technologies Used:

- Back-end: Spring Boot (core logic, file handling, and expiration management)
- Security: Spring Security (authentication & role-based access control)
- API Documentation: OpenAPI (Swagger) for interactive API documentation
- Database: MySQL (stores user data, file metadata, and access permissions)

Education

Burdwan University, Bardhaman, West Bengal 713104, India Bachelor of Computer Applications (BCA)	2022 - 2025
Burdwan CMS High School (State Board) Higher Secondary (H.S)	2021 - 2022

Certifications

Java Full Stack Certifications

Diploma in Computer Application
